1. User Manual Introduction

In 2005, the EC Delegation in Mozambique hired a consultant in the context of the EU Pilot Initiative on Coordination & Harmonization in order to establish among other a common EU Project Database DbIS. This database was established, centralizing and making available the information on activities of all EU Member States operating in Mozambique.

In a further step of overall Donor harmonization in Mozambique in the light of the Paris Declaration, it was agreed to open up the EU DbIS to ALL Donors present in Mozambique and merge with the UN Project Database to a new common Donor database called ODAmoz.

This initiative was fully endorsed by the Development Partners Group in charge of the simplification and harmonization of development cooperation in the country.

In light of the need to guarantee Government of Mozambique ownership and to ensure a proper administrative set up of the project, management of ODAmoz was handed over to the designated directorate in the Ministry of Planning and Development (MPD): the Direcao Nacional de Investimento e Cooperacao (DIC) in September 2006 and a ODAmoz Management Committee installed in late 2006, composed of Donor and GoM representatives.

ODAmoz' Vision

ODAmoz is becoming more and more Donor inclusive, and is seen as a very useful tool, e.g. in the On/Off-Budget discussions with the Government of Mozambique and in providing a common source of information for many of the Donors involved that are revising their country strategies.

The intention is therefore, among other, to train focal points in each sector line ministry at central and provincial level as users in order for the Government of Mozambique to fully exploit ODAmoz's potential.

This user manual is a living document. Its purpose is to be of use and support for you, the user. To that end, if you have suggestions about how to improve it please sent an email to Alberto Chicava Manhuse (achicava@mpd.gov.mz), Candido Jeque (sibanhule@yahoo.com.br), Cora Ziegler-Bohr (cora.ziegler-bohr@odadata.eu) and support-mozambique@dgfoundation.org

1.1 Purpose of this system

The main objective and focus of ODAmoz is to provide donors with a tool, based on international standards (e.g. OECD/DAC sector codification), to fulfil their obligations towards the Government of Mozambique of reporting and planning on quarterly disbursements (see downloads).

It also gives the GOM, donors and the public in general a snapshot of donors and UN agencies projects and financial commitments.

ODAmoz has two main goals:

- To improve the coordination and harmonisation among donors and development partners; and
- To provide a public overview of donor strategies, programmes and projects in Mozambique.

1.2 Why a *web-based* database?

A successful multi-user database has several key elements. These include:

- data collection;
- data maintenance;
- data publishing; and

- support.

A web-based database reduces management risks because of the following advantages:

- a. The data collection follows a decentralized approach. Data can be entered on any computer that is connected to the Internet.
- b. The data can be updated anytime and anywhere. There is no need to distribute and collect questionnaires.
- c. As reports on the Internet can directly retrieve data from the database, published project information are up to date at any time.
- d. Users who are familiar with the Internet find themselves in a customary environment.
- e. There is no need to distribute and install additional software. New database releases do not require any action from the user side.

1.3 Scope of information

Update timeline

As mentioned above, ODAmoz focuses on reports on quarterly disbursement data and forecasts for the current year and annual values for further 3 or more years according to Medium Term Expenditure Forecast (MTEF) procedure

The ODAmoz Management Committee agreed to link the update procedure to the Official Budget Cycle of GoM. In general the update deadlines will be followed according to below mentioned dates:

1st Quarter:	1st of April - 15th of May
2nd Quarter:	1st of July - 15th of August
3rd Quarter:	1st of October - 15th of November
4th Quarter / Yearly report:	15th of January - 15th of February

It is up to each donor to determine the level of detail to be displayed in the database and individual donors are requested to input information on their activities according to programme, project or sub-project directly. This saves time, ensures accuracy of data, and contributes to across donor ownership of the database.

It is anticipated that in most cases project level information is provided, but that sub-project level should also be taken into consideration if the sub-projects reflect sector specific activities of a project and/or if its location, partner or financial data differ from each other. Programme level should be chosen if the programme's projects contribute to the same sector, if they are supported by a limited number of partners and if the duration, location and government counterpart are in line to a large extent.

UN Reporting Specificity

Due to UN's specific and heterogenic funding arrangements (working with both core and donor funds) and the difficulty in separating them, it has now been agreed that UN agencies can fully report on their overall funding (core + donor) even if possibly already reported by a Donor in ODAmoz. The respective Donor implementing a project via an UN Agency will need to explicitly state this in the concerned Project Nr e.g.: An EC Project Nr: 9ACPMOZ011, implemented via UNDP should be inserted in ODAmoz as 9ACPMOZ011/UNDP.

Donor Totals and UN Agency totals therefore should not be added up in order to avoid double counting. In the Search by Donor Report, Donors and UN Agencies already have been separated. It is planned to enable this for each query possibility.

Please note that this therefore does not always enable us to have a clear picture of the full combined Donor and UN agencies ODA to Mozambique.

Responsibility

Each Donor and UN agency has selected a focal point that is responsible for collecting, entering and updating the data online on a quarterly basis. Accuracy and completeness of the data can only be guaranteed up to the last quarterly disbursement; forecasts are based on estimates.

The Ministry of Planning and Development (MPD) and its Directorate for Investment and Cooperation (DIC) is gradually taking up responsibility for the general overview of the database and production of the quarterly reports on Donor disbursements.

1.4 The ODAmoz User

ODAmoz has two main groups of users, the focal points (data provider) and the general public (data viewer/audience). Therefore **ODAmoz** can be accessed in two ways, through two different interfaces. One is the data input or maintenance interface, which is password protected and only used by donor focal points to enter and update their data. The other is the data presentation interface, which is freely accessible for anyone through <http://odamoz.org.mz/> and used to view the Donor Profiles and the project lists and reports. It is expected there will be several main users of these lists and reports including development partners (donors, UN agencies and other organisations and institutions) and the general public.

1.5 Responsibilities

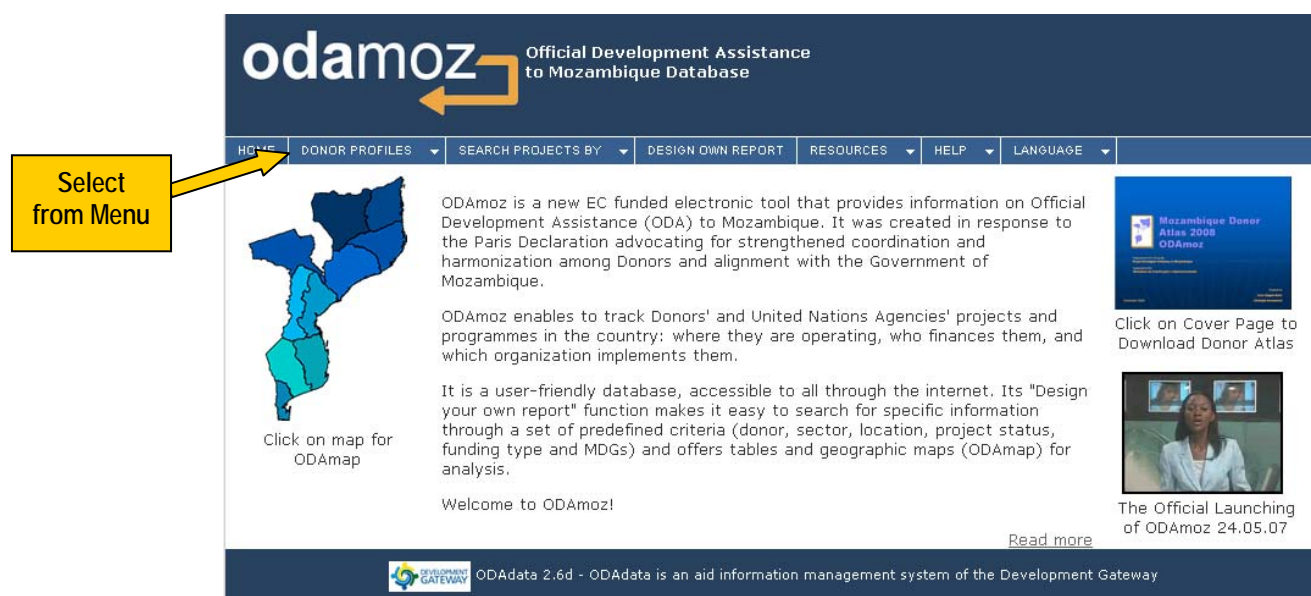

ODAmoz was established in 2005 by ODAdatA, a consultancy group that joined forces with the Development Gateway in 2008. The responsibilities of all involved partners are outlined as follows:

Donor Focal Point	MPD & Donor Coordinator for ODAmoz
<ul style="list-style-type: none"> • Provide complete, accurate and up-to-date Donor and project data • Maintain and quarterly update database with Donor and project information 	<ul style="list-style-type: none"> • Technical responsibility • Quality control • User trainings and password management • Support for focal points regarding data entry

1.6 Contact / Support

Questions, requests and suggestions can be sent to Alberto Chicava Manhusse (achicava@mpd.gov.mz) , Candido Jeque (sibanhule@yahoo.com.br), Cora Ziegler-Bohr (cora.ziegler-bohr@odadata.eu) and support-mozambique@dgfoundation.org or through the Virtual Working Group.

2. Using ODAmoz

The screenshot shows the ODAmoz website. At the top is a dark blue header with the 'odamoz' logo and the text 'Official Development Assistance to Mozambique Database'. Below the header is a navigation menu with links: HOME, DONOR PROFILES, SEARCH PROJECTS BY, DESIGN OWN REPORT, RESOURCES, HELP, and LANGUAGE. A yellow callout box with an arrow points to the 'DONOR PROFILES' link, containing the text 'Select from Menu'. On the left side of the main content area is a map of Mozambique with a legend that says 'Click on map for ODAmap'. The main content area contains text describing ODAmoz as an EC-funded electronic tool, its purpose in response to the Paris Declaration, and its user-friendly features. A 'Welcome to ODAmoz!' message is at the bottom of the text. On the right side, there are two images: the top one is the cover of the 'Mozambique Donor Atlas 2008 ODAmoz' with a callout 'Click on Cover Page to Download Donor Atlas', and the bottom one is a photo of a woman speaking at a podium with a callout 'The Official Launching of ODAmoz 24.05.07'. At the bottom of the page is a dark blue footer with the Development Gateway logo and the text 'ODAdatA 2.6d - ODAdatA is an aid information management system of the Development Gateway'. A 'Read more' link is also present in the footer area.

On the introductory page with the main menu items listed on the top side of the screen (from left to right):

- Home
- Donor Profiles
- Search Projects by
- Design own Report
- Resources
- Help
- Language

This page gives you an overview of **ODAmoz**, its purpose and history while serving as the entry point to all reporting needs. You can also reach the **ODAmaz** tool from this page (explained in a separate chapter).

ODAmoz is a new EC funded electronic tool that provides information on Official Development Assistance (ODA) to Mozambique. It was created in response to the Paris Declaration advocating for strengthened coordination and harmonization among Donors and alignment with the Government of Mozambique.

ODAmoz enables to track Donors' and United Nations Agencies' projects and programmes in the country: where they are operating, who finances them, and which organization implements them.

It is a user-friendly database, accessible to all through the internet. Its "Design your own report" function makes it easy to search for specific information through a set of predefined criteria (donor, sector, location, project status, funding type and MDGs) and offers tables and geographic maps (ODAmaz) for analysis.

List

The project list provided offers the user the same detailed listing of projects in the selected Region or Municipality as in the predefined lists according to Donors or Sector, giving you a first overview of the projects in the selected region: their Project Number, Title, Total Commitments, Total Disbursements, Undisbursed Funds, Forecasted Commitments, Forecasted Disbursements, Start and End Date.

Full totals are available at the bottom of the list. The totals will be separated between the Donors and UN agencies in order to avoid double counting.

Links to the individual complete project information in the **Project Fact Sheets** is available on the left side, a choice of the output **currency** on the top.

Following list shows projects in the region of Cabo Delgado:

2.3 Search Projects by “Design Own Report”:

The “**Design Own Report**” function of **ODAmoz** is its most powerful and user-friendly reporting tool. With this tool, users are able to filter content available in the database according to their needs, using different criteria such as Donors, Regions, Millennium Development Goals, DAC Sectors, Grant and Loan, Aid Modality, On/Off Budget and Treasury, Type of Aid as well as Status. “**Design Own Report**” also enables information queries in the archive of **ODAmoz** with completed projects, starting as of 2006.

In order to reach the “**Design Own Report**” function you need to select the relevant link on the menu bar of **ODAmoz**:

ODAmoz is a new EC funded electronic tool that provides information on Official Development Assistance (ODA) to Mozambique. It was created in response to the Paris Declaration advocating for strengthened coordination and harmonization among Donors and alignment with the Government of Mozambique.

ODAmoz enables to track Donors' and United Nations Agencies' projects and programmes in the country: where they are operating, who finances them, and which organization implements them.

It is a user-friendly database, accessible to all through the internet. Its "Design your own report" function makes it easy to search for specific information through a set of predefined criteria (donor, sector, location, project status, funding type and MDGs) and offers tables and geographic maps (ODAmaz) for analysis.

Here you will find following possibilities: Fields to Display, Filter criteria and Output Options.

In the Fields to Display you can choose the data fields of the table that you want the system to create for you e.g. donors, commitments, project status etc.

In the Filter criteria you can choose which projects will be displayed in the table you are creating, e.g. projects of certain donors, certain locations, projects that are ON Budget etc.

The output option enables you to choose between disaggregation, exchange rate tables you want to apply and the format of your output.

Query results can be shown either as **web output** window or as **Excel** spreadsheet for further user needs and individual applications. In the Web output format you also have access to the individual fact sheets.

Further query results can be shown in **different currencies as output**. A list of used currencies and exchange rates can be found under the menu item Resources. The exchange rates used are the average exchange rates from the e-Sistafe and Partner databases. The current and forecast years use the average exchange rates of the past year.

- **Disaggregation**
 - Disaggregate fundings by DAC-CRS Sector/Location – If you select this option as well as select a DAC Sector or Location as a filter option, project fundings will be disaggregated by this option. For example, if a project has 1,000,000 USD in commitments with two sectors: Forestry (50%) and Education (50%), a report filtered by Education would apply the 50% percentage to the total commitments.
- **Exchange Rates**
 - For each set of funding items: Historic, Current, and Forecasts, please select which exchange rate table to use. By default, the report creator will use the Donor Partner tables.
- **Output Format**
 - Please select the currency for the report output
 - Please select either a web-format report or an Excel report.
