## 1. User Manual Introduction

ODAnic is the online database of Official Development Assistance (ODA) from EU Member States to Nicaragua. It was created in response to the Paris Declaration on Aid Effectiveness, which advocates stronger coordination of donor activities and better alignment of aid with the poverty reduction strategy of the Government of Nicaragua. In the spirit of increasing aid harmonization, starting in 2009, ODAnic now contains information on assistance from a wide range of donor organisations.

ODAnic is user-friendly, free of charge, and available to all. Users can search for projects by donor, sector, and other criteria, and create custom reports using the "Design Your Own Report" function. ODAnic also contains donor profiles with each EU Member State's strategy for assistance to Nicaragua. With ODAmap, users can locate projects by geographic location. The EU Blue Book is an interactive, online resource with graphs and other tools to help users understand and analyze the data.

**ODAnic and the EU Bluebook** are currently available online at <http://nic.odadata.edu>. **ODAnic** enables users to run a variety of reports including a full list of development activities, reports by DAC sector, by region, by Donor, as well as offering detailed **commitment and disbursement information and 3 year forecasts** on specific projects themselves. The EU Bluebook offers dynamic, database linked, information on the structure and content of EU Development Cooperation in general as well as specifically in the Nicaraguan context. Individual Donor Profiles, including EU donor country strategies, for the European Commission and all EU Member States active in Nicaragua, are available.

Information will be managed online by donors themselves who have designated focal points to oversee data entry.

This user manual is a living document. Its purpose is to be of use and support for you, the user. To that end, if you have suggestions about how to improve it please contact the **ODAnic Master Focal Point** at: [odanic@dgfoundation.org](mailto:odanic@dgfoundation.org)

### 1.1 Purpose of this system

The overarching purpose of **ODAnic** is to improve coordination and harmonisation among international donors in Nicaragua and to provide essential information for donors and the Government of Nicaragua with a snapshot of donor development assistance programmes and projects as well as strategies. **ODAnic** serves as an online tool to view and update the data, and generate reports in the form of profiles, tables and geographic maps that can be printed or posted on a website.

**ODAnic** has two main goals:

- To improve the coordination and harmonisation among donors and development partners; and
- To provide a public overview of donor strategies, programmes and projects in Nicaragua.

### 1.2 Why a *web-based* database?

A successful multi-user database has several key elements. These include:

- data collection;
- data maintenance;
- data publishing; and
- support.

A web-based database reduces management risks because of the following advantages:

- a. The data collection follows a decentralized approach. Data can be entered on any computer that is connected to the Internet.
- b. The data can be updated anytime and anywhere. There is no need to distribute and collect questionnaires.
- c. As reports on the Internet can directly retrieve data from the database, published project information are up to date at any time.
- d. Users who are familiar with the Internet find themselves in a customary environment.
- e. There is no need to distribute and install additional software. New database releases do not require any action from the user side.

### 1.3 Scope of information

In order to improve coordination and harmonisation among donors present in Nicaragua and to provide forecast information for the Nicaragua Budget Cycle and SYSODA, **ODAnic** includes ongoing projects as well as pipeline projects where possible.

As of February 2009, 21 donor/partner agencies have agreed to participate in **ODAnic**: **Austria, Canada, Denmark, EC, Finland, France, Germany, Iceland, Inter-American Development Bank, Italy, Japan, Luxembourg, Netherlands, Norway, Spain, Sweden, Switzerland, U.K., United Nations Development Program, the United States, the World Bank**

It is up to each donor to determine the level of detail to be displayed in the database and individual donors are requested to input information on their activities according to programme, project or sub-project directly. This saves time, ensures accuracy of data, and contributes to across donor ownership of the database.

It is anticipated that in most cases project level information is provided, but that sub-project level should also be taken into consideration if the sub-projects reflect sector specific activities of a project and/or if its location, partner or financial data differ from each other. Programme level should be chosen if the programme's projects contribute to the same sector, if they are supported by a limited number of partners and if the duration, location and government counterpart are in line to a large extent.

### 1.4 Structure

The structure of **ODAnic** includes among other the following data series **for individual Projects**:

1. Project Title	14. Implementation Level
2. Project Description	15. Type of Implementation
3. Donor Project Number	16. Aid Modality
4. OECD Number	17. Type of Funding
5. Recipient Country Budget Number	18. Rio Policy Markers
6. Donor Agency	19. Contact Information
7. Related Country Strategy	20. Related Millennium Development Goal
8. Project Status	21. Project Location
9. Start Date	22. Co-Funding Donor
10. End Date	23. Historic Funding
11. Project Focal Sectors	24. Current Funding
12. Implementing Agency	25. Projected Funding
13. Contracted Agency	

*Donor focal points are responsible for inputting the data online. See Appendix glossary for details and definitions*

The structure of **ODAnic** includes among other the following data series **for Donor Profiles**:

1. Management System for ODA	15. Period Covered
2. Total Staff in Nicaragua	16. Amount Foreseen
3. Total Expatriate Staff	17. Internet Link
4. Total Local Staff	18. Focal Sectors and their Regions
5. Contact Address	19. Disbursements versus EU Disbursements in %
6. Degree of Centralisation–Programming	20. Grant versus Loans in %
7. Degree of Centralisation–Project Appraisal and Approval	21. Multilateral ODA versus Total ODA in %
8. Degree of Centralisation–Tenders	22. Btilateral ODA versus Total ODA in %
9. Degree of Centralisation–Commitments and Payments	23. Support to NGOs versus Total ODA in %
10. Degree of Centralisation–Monitoring and Evaluation	24. Top 3 Regions
11. Commitment to Budget Support	25. Disbursements in Millions 2007 and 2008
12. Commitment to sector-wide approaches	26. Disbursements per DAC Sector
13. Commitments to projects	27. Summary of current Country Strategy or Policy
14. Country Strategy Paper Yes/No	

*Donor focal points are responsible for inputting the data online. See Appendix glossary for details and definitions*

## 1.5 The ODAnic User

**ODAnic** has two main groups of users, the focal points (data provider) and the general public (data viewer/audience). Therefore **ODAnic** can be accessed in two ways, through two different interfaces. One is the data input or maintenance interface, which is password protected and only used by donor focal points to enter and update their data. The other is the data presentation interface, which is freely accessible for anyone through <http://nic.odadata.edu> and used to view the EU Bluebook and the project lists and -reports. It is expected there will be several main users of these lists and reports including development partners (donors, UN agencies and other organisations and institutions) and the general public.

## 1.6 Responsibilities

With support from DFID, ODAnic was established in 2007 by ODAdata, a consultancy group that joined forces with the Development Gateway in 2008. ODAnic was created to centralize and publish information on the activities of the European Commission and all EU Member States operating in Nicaragua. In 2008, DFID extended ODAnic to the entire donor community in Nicaragua and provided support to Development Gateway to improve the system, create the EU Blue Book, and work with the local counterpart, Xolo, S.A.

After clicking **Add New**, you will be brought to the data entry form. The data entry form has 5 pages of fields and are separated by tabs. You can access the other pages by clicking the different tabs or by clicking the **Previous** and **Next** buttons.

### 2.1.1 Profile Information

The Profile Information step of the data information form contains several fields about the basic information about a development activity. The fields on this page are:

- Project Title
- Description
- Donor Project Number
- OECD Number
- Recipient Country Budget Number
- Donor Agency
- Related Country Strategy
- Project Status
- Start Date
- End Date

## 2.1.2 Sectors/Agencies

The Sectors/Agencies page contains more information about the project. The fields on the Sectors/Agencies tab are:

- Focal Sector
- Sector amount in %
- Implementing Agencies
- Contracted Agencies
- National/Regional Implementation
- Type of Implementation
- Aid Modality
- Type of Funding
- Website
